

For Years I have known and worked with Jim Gerold of Gerold Brothers and it has always been a pleasure. Jim Gerold's experience, expertise and professionalism make for a highly successful collaboration between client, builder and architect. Gerold Brothers' attention to construction detail is equal to the craftsmanship produced by George, Mike and Chris in Jim's Cabinet and Trim Shop. The precision and care with which Gerold Brothers craft roof flashing, construction connections, insulation, waterproofing, is equal to their architectural moldings, flooring, built-ins and cabinetry. The end result is a piece of architecture that is built to provide the client with years of enjoyment.

James Bouler, Architect, AIA
